43. Prior period errors

Asset verification results

During the current year, management embarked on a process to verify its assets to ensure the existence, completeness and condition thereof. In addition the classification of certain assets and asset types were re-evaluated and corrections were identified. This included:

Retentions that were recognised at the wrong amount

Properties that were identified to have leases over it which were moved from Property, plant and equipment to Investment property

Depreciation that started late on a project.

Statement of financial position

44. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance. The municipality uses derivative financial instruments to hedge certain risk exposures. Risk management is carried out by a central treasury department (entity treasury) under policies approved by the accounting officer. Municipality treasury identifies, evaluates and hedges financial risks in close co-operation with the municipality's operating units. The accounting officer provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Notes to the Financial Statements

| Figures in Rand | 2019 | 2018 |
|-----------------|------|------|

44. Risk management (continued)

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

45. Going concern

We draw attention to the fact that at 30 June 2019, the municipality had an accumulated surplus (deficit) of R 858 184 862 and that the municipality's total assets exceed its liabilities by R 858 184 862.

The municipality's current liabilities exceeds it current assets by R 154 463 915. The municipality has been deducting pension, medical aid and pay as you earn from employees' salaries, but has not paid over R 3 067 489 (2018: R 11 979 826) of the amounts deducted to the relevant third parties. Outstanding amounts for bulk purchases included Eskom for electricity of R 179 133 293 (2018: R 135 354 844) and Bloemwater for water of R 1 717 800 (2018: R 293 770).

Management considered the following matters relating to the going concern assumption:

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The municipality's budget is subjected to a very rigorous independent assessment process to assess its cash-backing status before it is ultimately approved by Council.

As the municipality has the power to levy fees, tariffs and charges, this will result in an ongoing inflow of revenue to support the ongoing delivery of municipal services. Certain key financial ratios, such as liquidity, cost coverage, debtors' collection rates and creditors' payment terms are closely monitored and the necessary corrective actions instituted.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

The municipality is currently experiencing financial difficulties. Indicators of the financial problems are:

- 1. Deficit of R 40 952 719 (2018: R 88 390 055) was realised, Government grants and subsidies contributed R 143 676 253 (2018: R 114 194 194).
- 2. The creditors are not paid within 30 days as required by the MFMA due to cash constraints.
- 3. Employee benefits are unfunded.
- 4. High levels of distribution losses
- 5. Slow collection and low recoverability of outstanding consumer accounts A provision for doubtful debt amounting to R 372 739 261 (2018: R 289 450 881) has been disclosed in the financial statements.
- 6. Unfavourable ratios included the current and acid test ratios are below the required ratio of 2:1 and 1:1, respectively.

The following mitigating factors have been taken into account in concluding that the municipality remains a going concern:

- 1. The municipality falls within the local government sphere.
- 2. No intention by government has been identified that indicates the discontinuing of financial assistance through the provision of government grants.
- 3. The municipality has not been placed under any administration for the 12 months ending 30 June 2019.
- 4. The municipality has no unspent grants for the current year (2018: R 346 009).

AUDITOR-GENERAL P.O. BOX 315 2020 -05- 05 BLOEMFONTEIN, 9300 AUDITOR-GENERAL

Financial Statements for the year ended 30 June 2019

Notes to the Financial Statements

| Figures in Rand | 2019 | 2018 |
|-----------------|------|------|

50. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the financial statements.

Deviations totaling R 2 857 537 (2018: R 53 408), were incurred and reported during the financial year in accordance with the aforementioned legislative requirements. These consisted of deviations for emergency cases (i.e. transactions relating to pipe and sewer bursts and water pump repairs), procurement from sole providers(transactions relating to strips and quotes) and deviations that pertain to SCM regulations (obtaining three quotations) that could not be followed due to a various reasons.

51. Distribution losses

| Electricity | 14 481 826 | 13 348 706 |
|-------------|------------|------------|
| Water | 1 573 394 | 1 910 291 |
| | 16 055 220 | 15 258 997 |

Electricity

The municipality purchased 40 894 445 (2018: 42 555 914) units during the financial year and sold 26 766 040 (2018: 29 218 193) units during the year. Distribution losses at an estimated 34% (2018: 31%). Reasons for incurring electricity losses relates to the dissipation when electricity flows through the conductors, illegal connections, meter tampering and incorrect meteringt

Water

The municipality purchased 4 357 325 (2018: 4 194 522) units during the financial year, of which a total of 2 735 270 (2018: 2 225 149) units were sold. This represents a loss of 1 622 055 (2018: 1 969 373) units at an estimated 37% (2018: 47%). Water losses are the result of burst pipes, water provided but not metered, illegal connections, meter tampering.

52. Centlec arrangement

The municipliaty and Centlec (SOC) Ltd has entered into an agreement in terms of which Centlec manages, delivers and maintains all aspects of electricity sales, the associated debt collection and maintenance of the electricity network.

Centlec has, and will have, no title, ownership, lien, leasehold rights or any right of limited ownership in respect of the Network or any part thereof. Title to the Network, including all improvements thereto from time to time, shall at all times vest and remain vested in Mantsopa.

The agreement became effective on 1 July 2018 and shall endure until 30 June 2022, extending on the previous agreement to transact on prepaid electricity sales on behalf of the municipality.

Transactions undertaken by Centlec as the agent on behalf of the municipality include the sale of electricity both on credit and pre-paid, expenses to maintain the network, commission fees to resellers of electricity, assets purchased and installed on bahalf of the municipality and the collection of the debtors book.

53. Subsequent events

The following events were identified and disclosed after reporting date:

During July 2019, management identified fraud on the ABSA travel card which was reported during August 2019. An amount of R 308 268 was recovered from ABSA and the receivable was included in the balance of the travel card note 4

The legal claim against the municipality was settled in favour of the plaintiff Seabata Monyane and the legal claim of R 230 000 has been disclosed in note 19.

54. Budget differences

Material differences between budget and actual amounts

Statement of financial performance

Service charges

Strategies to increase cash collections included converting consumers to pre-paid electricity. The result from this was much better than expected.

Other income

Connections were budgeted as R 9 million but due to the new strategies implemented by debt collections, reconnections were much lower than budgeted as consumers were converted to pre-paid electricity sales.

Rates

The budget for rates was based on the total of the valuation roll, but as part of the reconciliation certain revenues had to reversed.

Grants and subsidies

The budget does not includes the R 3 million grant paid directly to the Auditor General and a grant of R 1 million from Teta.

Repairs and maintenance

The budget for repairs and maintenance is included in General expenses

Depreciation

The municipality did not appropriately budget for depreciation.

Debtors impairment

The municipality is in the process of cleansing debtors data as part of revenue enhancement strategies. As part of this process accounts are reviewed and billings accordingly updated. This resulted in an higher than expected debt impairment.

54. Budget differences (continued)

Bulk purchases

The differences relates to higher than expected electricity purchases.

Contracted services

The budget for contracted services includes audit fees of R 4.5 million and consulting fees of R 5.6 which is included general expenses for financial statement purposes.

Finance cost and General expenses

The budget for finance costs is included in general expenses for budget purposes. While contracted services and consulting fees was included in contracted services.

Actuarial gains

Actuarial gains are not considered for budget purposes as it is a non cash item that is determined by a specialist.

Statement of financial position

VAT receivable

VAT receivable difference in budget relates to the higher than expected balance from trade payables.

Trade receivables

Trade receivables are lower than expected due to the debt impairment which is higher than expectd.

Investment property

Investment property is higher than expected due to properties that were expected to be derecognised in the current year, as the properties are in the name of the municipality but future economic benefits is unclear.

Property, plant and equipment

The difference in Property, plant and equipment is the result of budgeting the incorrect amount for depreciation.

Payables from exchange

The Eskom debt increased more than expected, while cash flow constraints resulted in payables not being paid as planned.

Payables from non-exchange

This relates debtors with credit balances which is not budgeted for.

Employee benefits and Provisions

The budget for employee benefits and provisions was not updated per the prior year expectation by error.

Cash flow statement

Sale of goods and services

Cash flow is lower than expected due to the lower than budgeted debt collection.

Employee costs

Management planned to settle the majority of the amounts owing to third parties. This did not materialise due to cash flow constraints.

Suppliers and Finance costs

Cash paid to suppliers is lower than expected due to cash flow constraints.

Property, plant and equipment

Purchases is lower than planned due to strategies to increase cash flow.
