It is expected that all Components' operations and processes will be subjected to the risk management strategy. It is the intention that these components work together in a consistent and integrated manner, with the overall objective of reducing risk, as far as reasonably practicable.
 - The realisation of our strategic plan depends on us being able to take calculated risks in a way that does not jeopardise the direct interests of stakeholders. Sound management of risk will enable us to anticipate and respond to changes in our service delivery environment, as well as make informed decisions under conditions of uncertainty.

 - Maintaining an environment, this promotes the right attitude and sensitivity towards internal and external stakeholder satisfaction.
 - An entity-wide approach to risk management is adopted by the municipality, which means that every key risk in each part of the municipality will be included in a structured and systematic process of risk management. All risk management efforts will be focused on supporting the municipality objectives. Equally, they must ensure compliance with relevant legislation, and fulfil the expectations of employees, communities and other stakeholders in terms of corporate governance.
 - Risk management must be embedded in the strategic planning of Mantsopa local municipality.
 - As risk management is necessary for planning and decision making, it must be embedded in all the decision making processes. Before decision is taken, the risks it poses must be identified.
 - Mantsopa local municipality risk tolerance level must be determined by top management and needs to be outlined in the Risk Management Strategy.
 - The associated risks of proposed actions and decisions must be properly identified, evaluated and managed to ensure that exposures are acceptable.
 - Mantsopa local municipality will conduct a risk assessment on an annual basis with a review or re-assessment of the risks conducted on quarterly basis to ensure maximum mitigation thereof.
